RE: Sheldon Meadow and Sheldon West (20 Hancock Street and 1139 West Street)

Dear Board Members,

We are writing this letter to voice our concerns about the application for the Senior Living Community projects proposed at 20 Hancock Street and 1139 West Street. We previously sent a letter on July 14, 2022 that expressed our concerns about the copious amount of fill required for this development and how this project cannot possibly comply with the Earth Removal bylaws of Wrentham. (link: <https://townofwrentham.hosted.civicle.com/common/pages/DisplayFile.aspx?itemId=1876566> 6)

A letter was also submitted by Pawtucket Water Supply Board (PWSB) on July 18, 2022 which listed several concerns which are shared concerns that have been voiced by many local citizens (link: <https://townofwrentham.hosted.civicle.com/common/pages/DisplayFile.aspx?itemId=1876668> 8)

The applicant's engineer (Kristin LeBrie) stated during the Dec 1, 2022 Conservation Commission meeting that they have received a response from Pawtucket Water Supply District that (paraphrasing) "*they are comfortable with how the applicant has stated they will address those concerns.*" Please see the following Wrentham Cable 8 video at approximately 1hr 20min: <http://71.184.243.40/CablecastPublicSite/show/8134?channel=2>

There only seems to be one letter from PWSB posted as an exhibit on the Town government board sites for "Projects Under Review". **Is it possible that this follow up letter from PWSB can also be shared along with the specific responses by the applicant for how the concerns listed in the PWSB board from July 18, 2022 will be addressed?** This follow up information from the applicant's engineer would be VERY helpful to those of us who have voiced similar concerns since the start of this project.

Respectfully,

Brenda and Thomas Ihley
