Subject: West Wrentham Proposed Development

I would like to state my objections to the "senior living community" that is being proposed for the west Wrentham site. This development does not fit the character of Wrentham but is just a cluster of too many houses for the space. I am concerned with the amount of fill needed to make allowances for septic tanks. If you need to truck in so much fill maybe this is not the right project for the space? There must be more repercussions on other areas - drainage, water flow, flooding?

I am concerned about the impact on the traffic on an already very busy street. I am concerned for the abutters to the development and how it will change their properties.

This would be a very isolated "senior living" community. Residents would not have anywhere to walk to - just the one convenience store adjacent to the development. Wrentham does not have ready transportation to bring residents to other areas of the town. People living here would have to drive everywhere.

While I understand that development of this property is inevitable, this proposal for twenty-five houses is just not right for Wrentham.

Sincerely,
Nancy Haley
347 Spring Street
