Subject: Urgent! Regarding the Special Permit Application for a 9 or 16 Unit Senior Living Community:

To Whom It May Concern:

I am writing to express my disappointment that this email is necessary. It should not be necessary, but here we are: still having to fight a "community" project the actual Sheldonville community does not want. In fact, this project would devastate Sheldonville Village. It is being proposed as a sort of compromise. Yet, if this project is given the green light, the impact on local flora and fauna, and residents and taxpayers who love this land, remains the same. Please consider another location in Wrentham- any other place that makes sense.

As the daughter of Sheldonville residents, as someone who grew up loving every bit of its rural character, I cannot understand why we are not prioritizing the much-needed West Wrentham Town Well. The tenuous water supply situation in Sheldonville should be adequately addressed, and we should NOT be building on wetlands!!! And for what?? For who? An outside developer who has no consideration for the voices of this community.

Traffic has also already been an issue of concern, and with this increase in traffic, there will certainly be an increase in accidents. This is not being built in the best interest of the town, and there will certainly be flooding, septic failures, noise pollution, and a change in the rural character that we love. That we SHOULD be protecting at all costs.

Please take the above into true consideration. Please do the right thing for this community.

Best,
Katrina Shepard
